CONDITIONAL STATEMENTS SOLUTIONS

Solution 1:

```java
import java.util.*;

public class Solution {
   public static void main(String[] args) {
       Scanner sc = new Scanner(System.in);
       int x = sc.nextInt();

       if (x > 0) {
           System.out.println("x is greater than 0");
       } else {
           System.out.println("x is less than or equal 0");
       }
   }
}
```

Solution 2:

```java
public class Solution{
   public static void main(String[] args) {
       double temp = 103.5;
       if (temp > 100) {
           System.out.println("You have a fever");
       } else {
           System.out.println("You don't have a fever");
       }
   }
}
```

Solution 3:

```java
import java.util.*;

public class Solution {

 public static void main(String args[]) {
```

```
    Scanner sc = new Scanner(System.in);
    /* Input week number from user */
    System.out.println("Enter week number(1-7): ");
    int week = sc.nextInt();

    switch(week) {
        case 1:
            System.out.println("Monday");
            break;
        case 2:
            System.out.println("Tuesday");
            break;
        case 3:
            System.out.println("Wednesday");
            break;
        case 4:
            System.out.println("Thursday");
            break;
        case 5:

            break;
        case 6:
            System.out.println("Saturday");
            break;
        case 7:
            System.out.println("Sunday");
            break;
        default:
          System.out.println("Invalid input! Please enter week number between
1-7.");
    }
  }
}
```

Solution 4:

Value of x = false & y = 63..

Solution 5:

```java
import java.util.*;

public class Solution {
 public static void main(String[] args) {
       Scanner sc = new Scanner(System.in);
       System.out.print("Input the year: ");
       int year = sc.nextInt();

       boolean x = (year % 4) == 0;
       boolean y = (year % 100) != 0;
       boolean z = ((year % 100 == 0) && (year % 400 == 0));

       if (x && (y || z)) {
           System.out.println(year + " is a leap year");
       } else {
           System.out.println(year + " is not a leap year");
       }
   }
}
```
